

Genetic Genealogy and the 1921 Graves Investigation

Alison Wilde
Director of FIGG
Genealogy Case Manager
alison@coldcasehelp.com

1921 Tulsa Identification Project
Our original DNA database is known to assist the City of Tulsa in identifying the 1921 Tulsa Race Massacre. A number of mass graves were found in Oklahoma during the summer of 1996 after a storm, which the City discovered a number of bodies in the graves.

Public we can start the work of identification, we are going to have the support of professional genealogy experts, mostly and those who are especially interested in the Tulsa Race Massacre of 1921.
